

Question 3: Stairs

New Scanner scan

While scan.hasNext()

Scan next line into double TotalRise

int steps = TotalRise / 7.75

double r = TotalRise / steps

Int s = steps - 1

double minD = 24.00 - 2r

double maxD = 25.00 - 2r

Round both values to two decimal places

Print (s + " " + minD*s + " " + maxD*s)
